No. The contractor at the time, Brenda Stein, was preparing a permit renewal application on behalf of PTP.....PTP's UIC permit was scheduled to expire in Sept. 09. To my knowledge no work was done after the plans were submitted to EPA, but whether the plans accurately reflect what is actually on (and in) the ground at the site today has not been verified. However, having said this, I doubt very much that the plans are off by much, and, in fact, the plans are probably pretty darn accurate. It's just that I wouldn't swear to it! A

The survey plans, which were approved, were done by PTP's contractor. However, what actually went into the ground may differ from the plans, which is not all that unusual w/ large construction projects. A

Aaron:

Thanks for this new information. I need to change the SOW because survey work has been done. Were these drawings part of a project or simply a surveying effort? Who paid for this work?

Thanks,

John
